

PRODUCT
FEATURES

LIGHTWEIGHT

Constructed from lightweight aluminum, and utilizing a balanced weld free design, the Rack-IT can be installed with minimal impact on weight capacity. The Rack-It design is 50% to 85% lighter than other SCBA & SCUBA storage solutions.

**DURABILITY &
STRENGTH**

Unlike steel based SCBA and SCUBA cylinder storage solutions which are susceptible to rust and corrosion, the Rack-It's durable high strength aluminum design provides a potentially significant increase in life span.

COMPACT DESIGN

The Rack-It's compact design offers the highest space efficiency available on the market, leaving more room for critical equipment and gear.

**COMPLETE
VERSITILITY**

Available in virtually any configuration, the Rack-It provides the ability to be used in both mobile and fixed environments.

SCBA / SCUBA Cylinder Storage Racks

- Lightweight versatile design allows for easy and safe storage of SCBA and SCUBA cylinders in both mobile and fixed environments
- High strength aluminum alloy construction
- Available for 30,45,60, and 75 minute SCBA and SCUBA cylinders with custom designed storage bays available for any size cylinder
- Space for 1 to 1000 cylinders depending on your needs
- Lightweight and feature packed

The Rack-It SCBA / SCUBA cylinder storage rack was designed with several key factors in mind. We set out to produce one of the most cost effective and space efficient SCBA and SCUBA cylinder storage solutions on the market. In addition the Rack-It was designed with a sharp focus on weight, without sacrificing strength and functionality, and we sought to add features to the rack solution that provided functionality and simplified operation. The Rack-It provides all of this. With perhaps the most versatile design in the market today we are confident we can provide a cost effective space efficient solution to your SCBA or SCUBA cylinder storage needs.

With predesigned and custom designed sizing available to fit any SCBA or SCUBA cylinders, the Rack-It system provides the ability to fit your storage solution you need into any space you have available.

PRODUCT FEATURES

Rack-It Storage Solutions are manufactured using 1/8" Aluminum alloy.

Innovative weld free all rivet and interlocking design.

RUBBER RIDGED TRACTION LINING
 Rubber traction linings in each cylinder compartment help keep cylinders from sliding and prevent scrapes and scuffs. The ridges allow for moisture to escape. These liners are removable for easy cleaning.

WARRANTY
 Resolve Specialty Products offers a limited 1 year warranty on all products. Please read the warranty in detail for more information.

Extended warranties are available on this and many of our products.

SCBA / SCUBA Cylinder Storage Racks

- Pitched angle rack design keeps cylinders in place while stored and allows moisture to exit to the rear of the Rack-It and down the back channel
- Low profile engineering allows units to be installed side by side for maximum expandability.
- Some models may be stacked
- High strength no weld rivet assembly

Durable rubber linings provide:

- Protection for SCBA and SCUBA cylinders against exterior damage during storage
- Traction during storage to help minimize movement
- Channels for moisture to travel out of the Rack-It preventing mold and mildew from forming inside the cylinder holders
- Easy removal for cleaning and maintenance

- Rear bumper prevents damage to cylinders during loading and storage
- Rear ventilation holes help prevent suction or compression when loading and unloading cylinders

Contact your local sales representative today for pricing and configuration options, or contact RSP directly with any questions you may have. Our experienced sales staff can guide you through the process of selecting the storage solution that best fits your current needs

SCBA cylinder restraint and security options are available. Contact us for more information and we will provide you with the most cost effective method to suit your needs!
