## SpaceSaver® Cascade Refill System

- DOT/UN/ISO 6000 lb. high pressure cylinders secured by Klamp-It® bracket system.
- SpaceSaver® 100A SCBA Fill Station.
- 2 Bank RSP Air Control Panel .
- Rack-It® SCBA cylinder storage rack.

Resolve Specialty Products offers a complete solution to cover any cascade breathing air system needs. The SpaceSaver® system is ultra efficiently designed to minimize installation space requirements which leaves you with more room for life saving equipment and gear. Every component of the system was designed with this space premium focus in mind while avoiding the need for significant and costly body modification.

Shown above is the complete Cascade SCBA refill system. This installation features the SpaceSaver® 100A dual cylinder fill station combined with a two bank RSP Air Control Panel. The Klamp-It® bracket system is used here to secure two 6000# high pressure DOT cylinders. The custom Rack-It® SCBA storage rack allows easy storage and retrieval of 7 SCBA cylinders.

Contact your local sales representative today for pricing and configuration options, or contact RSP directly with any questions you may have. Our experienced sales staff can guide you through the process of selecting the cascade filling solution that best fits your needs
